

Low-Level Test Case: Uploading Cat Photos in "Crazy Cats" Mobile App

Objective: To verify the specific functionality of uploading cat photos in the "Crazy Cats" mobile application.

Preconditions:

- The "Crazy Cats" application is installed and logged in.
- The user has an active internet connection.

Steps:

- 1. Navigate to Upload Photo Feature:**
 - Open the "Crazy Cats" application.
 - Navigate to the screen/menu where photos can be uploaded.
- 2. Select a Cat Photo:**
 - Tap on the option to add a new photo.
 - Choose a photo of a cat from the device's gallery.
- 3. Upload and Verify Cat Photo:**
 - Initiate the upload process for the selected cat photo.
 - Ensure that the photo uploads successfully without errors.
- 4. Check Photo Requirements:**
 - Attempt to upload a photo that is not of a cat (e.g., a photo of another animal, a person, or an object).
 - Verify that the application prevents uploading and displays an appropriate error message.
- 5. Review Uploaded Photo:**
 - After successful upload, navigate to the profile or gallery section.
 - Confirm that the uploaded cat photo appears correctly and is displayed as intended.
- 6. Functionality Across Platforms:**
 - Repeat the above steps on both iOS and Android versions of the application (if applicable).
 - Ensure consistency in behavior and functionality across different platforms.

Postconditions:

- Exit the upload photo feature and return to the main application interface.
- Verify that the uploaded cat photo is visible and accessible in the user's profile or gallery.

Priority: Low

Severity: Low

Status: Open
